MIXFOOD OCTO overview

Mixfood OCTO is a lightweight (low CPU) 8 Oscillator Synthesizer with unlimited power and possibilities. Each oscillator is equipped with the following features:

- 6 different and independent mixable waveforms
- 4-Voice Unison
- Amp and Filter Envelope
- Over 200 patches
- Filters, tuning, EQ's and drop pitch to shape your sounds
- 6 Dedicated effects (chorus, phaser, delay, reverb, tremolo, isolator EQ)
- 2 LFO's, 2 extra Envelopes and a versatile Mod Matrix
- Separate audio outputs of the dry and wet audio signal

Global features include Pitchbend and Modwheel, Master Filter, Mono/Legato with Glide function.

Check it out and be amazed!

BACKSIDE

On the Backside (use the TAB button) there is a Separate Audio Output for each oscillator (Dry and Wet signal). Don't forget to enable it using the knobs! When using the Separate Audio Output's it's best to disconnect the Main Audio output because the audio signal will also still come through there!
